

遥控器实物图 REMOTE CONTROL UNIT

遥控抓斗操作示意图 Operation View of Remote control Grab

发射器发出信号到接受器，接受器接到信号后。常开点闭合，电磁阀得电，抓斗打开。无线遥控控制距离无遮挡的情况下 100 米，在室内一般不小于 50 米。

Sending machine sends signal to the receiver, after receiver receiving the signal, open point closed and solenoid valve charged, then the grab open. Controlling distance will be 100 meters, 50 meters inside doors.
